CRU Ref: D/18/18697

Ellen Diskin, Chair of DCRP
ESB Networks
Leopardstown Road
Dublin 18
Ireland

Re: Declared Supply Voltage parameter, compliance with RfG¹ 1.1 pu requirements, compliance with EN50160 and re-alignment of voltages.

Dear Ellen,

I refer to the ESB Networks correspondence to CRU of 24 August 2018 seeking approval of Distribution Code modification MPID 44, as recommended by the Distribution Code Review Panel meeting 27 June 2018.

The CRU is satisfied that ESB Networks has recommended this modification for approval by the CRU in accordance with the relevant provisions set out in the Distribution Code for the handling of revisions and that the views of stakeholders have been adequately considered and addressed. The CRU notes that this modification represents an appropriate implementation of the relevant requirements of the RFG and the CRU has had particular regard to the principles of proportionality and the lowest total cost in accordance with Article 7 of the RFG. The CRU requests ESNB consider these issues in any engagement regarding amendments to the current version of the RFG.

Having considered the modification and its supporting documentation the CRU approves this modification and directs ESB Networks to revise the Distribution Code which shall be deemed to be amended accordingly from the date of this letter.

Yours sincerely,

Robert O'Rourke

Manager, Electricity Networks
