Background

ECP-2 is the second stage of the CRU's development of enduring connection policy in Ireland. On the 10th June 2020 the CRU published their decision on ECP-2, which set policy for at least three annual batches of connection offers (ECP 2.1, ECP-2.2, and ECP-2.3). Subsequently, the CRU published their decision on ECP-2.4, which set policy for an additional batch of connection offers (ECP-2.4). On 25th September 2024 the CRU published their decision¹ on the Electricity Connection Policy – Generation and System Services (ECP-GSS) which will apply to onshore renewable and conventional generators, storage, and other system services technology projects connecting to the electricity system. In this decision paper, the CRU have directed the System Operators to process a final batch under the existing ECP-2 policy (ECP-2.5).

ESB Networks have used the ECP-2 decision paper², subsequent ruleset³ and ECP-2.4 decision paper⁴ to determine which Category B and Category C applicants have been successful in making the list of projects due to receive connection offers in the ECP-2.5 Batch.

This report contains the list of ECP-2.5 applicants processed under Category B and Category C as per the ECP-2 Decision Paper.

The CRU has decided that for ECP-2, there should be a possible connection pathway for specific sub-categories of projects to be connected outside the framework of the batch process.

The non-batch category B was open to the following projects:

- Small projects i.e. MEC greater than 6kW/11kW and less than or equal to 500kW
- DS3 system services trial projects - up to 500kW; and
- Autoproducers

The non-batch category C was open to the following projects:

- 100% community- owned projects where MEC greater than 0.5MW and less than or equal to 5MW
